August, 2012 - Volume 48 Issue 8

Welcome To

NOARS Country

Another NOARSFEST is in the books and in 2012 it came with a short break in the heat index to allow everyone ample time to browse thru the flea market without an umbrella as well as pick thru good things inside where the food was carried away in handfuls – I want to thank everyone who helped make this event go smoothly in spite of the construction barricades in so many places around the college. With ARRL Field Day and NOARSFEST off the calendar the time to relax is welcome as we think of ways to fend off the sunburn and the dog days of summertime. August 3d is MS Pedal to the Point leaving from Brunswick High School where riders go towards Sandusky High School for a spaghetti dinner, volunteering for this will be ham radio operators from the whole Northern Ohio area.

The Annual NOARS Picnic will be held August 20th at the Lorain Metroparks Duck Pond with NOARS providing soft drinks, water, hot dogs and hamburgers as in years past, we encourage you to bring a friend or family member with a dessert or covered dish to share with others. To meet who you may have not met in person but hear on the airwaves.

The September 17th meeting program will be cross-band repeater use, to demonstrate this handy feature for public service events. Ed Stevens KD8FTS will show us more magic of CTCSS operation to increase coverage areas, Ed KD8FTS is heavily involved in public service events.

Congratulations to KA8VTS DD and her crew for another fine job at a very important club function! Namely "NOARSFEST 2012"! All in attendance agree and what I've heard on the air it was a real nice hamfest! I have sketchy details but here's what I have:

Rant Department

Did you notice what I did? Attendance 188 & mobile check-ins 57! Does that mean that $188/57 = 3.28$ attendees per mobile! I wonder if \$3.50+ a gallon for fuel has anything to do with the slow demise of hamfests?

WANT MORE Got 6?

Go to: <http://www.noars.net/got6/GOT6.txt>

Not much on the list this month. So I'd like to remind you this years six meter activity (per the cluster) has been off the charts for the last few weeks. If you've got the six meter stuff you are missing a real big thing!

No antenna!! No problem!! If you want a nice easy (and effective) antenna here is the link to a site that will give you details for a six meter squalo. If you can solder copper pipe you can make this in about an hour. And when the band is open: if you can hear them you can work them!
